

RJ15 Caribbean Side-Entry Reservoir Bathing System

The RJ15 Caribbean is a freestanding tub with a reservoir feature which allows the tub to be filled quickly with simple one-touch operations. The low threshold and wide side-entry door allows easy access for residents with various degrees of mobility and the built-in contoured seat allows the resident to sit comfortably and safely in a slightly reclined position.

The sleek exterior design of the RJ15 Caribbean will give your bathing area an upscale spa look, with spacious cabinet storage for towels and other bathing accessories. There is a built-in automatic Ozonator for disinfection control in the reservoir tank, with a separate on-board disinfection system for the tub itself.

The Rane Bathing and Accessibility product line provides a unique combination of style, ease of use, comfort, and low cost of ownership.

- 100% made in the USA. Manufactured in Sparta, TN from the highest quality components and materials.
- A "Best in Class" Warranty resulting in low cost of ownership:
 - 5 years for external finishes and composite shell
 - 3 years on all moving and stationary parts
 - Lifetime warranty on the door seal
- Full set of Standard Features including a fast fill reservoir, thermostatic mixing valve, ozonator, handheld shower wand, built-in disinfection system, analog thermometer, secondary door lock, built-in storage cabinets, and 3/4" stainless steel supply lines.
- Nationwide Distribution and Customer Service.

The **built-in disinfection system cabinet** is conveniently located in the storage cabinet for easy access. The lockable cabinet provides a secure place for cleaning supplies and disinfectants.

The air jets on the **CleanRane™ Air Spa System** feature spring loaded check valves for back flow prevention, which eliminates the extra step to disinfect the air lines.

RJ15 Caribbean Reservoir Side-Entry Bathing System

Standard Features

- Fast Fill Reservoir, featuring a separate analog thermometer, allows the tub to be filled with 50 gallons in just 75 seconds with one-touch operations– a one touch button to fill the reservoir and a one touch button to release the water into the tub.
- Thermostatic Mixing Valve with anti-scald protection that dispenses 20 gallons per minute for fast tub fill.
- Ozonator integrated for disinfection control in the reservoir tank with automatic operations; no user input required
- Built-in Disinfection System that is the most time-efficient solution for disinfection of the bath's external surfaces and minimizes the risk of cross-infection.
- Handheld Shower Wand with separate controls for hair and upper body washing, which can be used at the same time the tub is filling.
- Analog Thermometer for monitoring tub-fill and shower wand temperatures.
- Secondary Door Lock to prevent accidental door opening when in use.
- Storage cabinets provide extra storage for bathing solutions and accessories.
- 3/4" Supply Lines constructed of stainless steel.

Optional Features

- CleanRane™ Air Spa System with variable speeds that enhance the therapeutic and relaxing effects of bathing for the user.
- Integrated television coming soon!

Why CleanRane™ Air Spa System?

The CleanRane™ Air Spa System enhances the therapeutic and relaxing effects of bathing and provides a pleasant experience for the resident. Hydromassage provides millions of preheated air bubbles in the water which increases stimulation of peripheral blood circulation, reduces pain and inflammation in the joints, gently massages away dirt, and induces deeper relaxation. The hygienic and low maintenance CleanRane™ Air Spa System features 12 air jets with spring loaded check valves for back flow prevention, which prevents water from entering the air lines. Unlike most other whirlpool and air spa systems, the CleanRane™ Air Spa System does not allow water to enter the air lines, which can become a breeding ground for bacteria and mold. The highly efficient CleanRane™ Air Spa System simplifies disinfection and reduces the possibility of cross-contamination. The motor is quiet, efficient, and has a ceramic heating element that blows warm air to help maintain the water temperature and warm the surface of the tub.

TECHNICAL SPECIFICATIONS

Length:	74"
Width (Tub):	33"
Width (Cabinet):	70.5"
Height (To Top of Cabinet):	73.5" (lowest setting)
